Filmscreen Corporation®

## Electriscreens with LUTRON Sivoia Quiet Electronic Drive (QED™)

### **Silent Operation**

Stewart Electriscreens with Lutron Sivoia Quiet Electronic Drive (QED™) are distinguished by their quiet operation. Available on Luxus Model A and Visionary Electriscreens, QED™ allows Stewart screens to operate in relative silence. Operation will not exceed 44dBA measured three feet from the Electronic Drive Unit.

### **Smooth, Silent Stops and Starts**

Impressively smooth and silent stops and starts enhance the viewing experience. Motor noise is virtually nonexistent.

### **Compatible**

Integrates with Lutron control systems and many outside systems such as home security or time clocks, without the use of external group controls or relay systems. 24 VAC low-voltage power allows Lutron Sivoia QED™ to be installed by low-voltage contractors. Infrared system provides easy, convenient control from anywhere in the room.

### **Accurate and Reliable**

The Lutron Sivoia QED™ has a 10-year power failure memory. The screen will stop in exact alignment within 1/16" accuracy.

### **Accessories**

A complete line of accessories maximizes flexibility. Lutron seeTouch™ keypads offer full-open, full-close, and raise/lower functionality. A handheld transmitter offers open/close and fine-tune raise/lower control.

### **Trust Stewart**

Stewart Filmscreen has been designing and manufacturing the world's finest projection screens for home and commercial markets for more than 58 years. A family-owned business, Stewart Filmscreen maintains the highest standards in screen design and craftsmanship. Each screen is handmade, so custom sizes and configurations can easily be accommodated.

# Electriscreens with Lutron Sivoia QED™

## Screens Available with QED™

Luxus Model A (see individual spec sheet for details)  
 Visionary (see individual spec sheet for details)

## Standard Screen Features
